

GNANAPRAKASH G

Aspiring AWS DevOps Engineer

mailofggprakash@gmail.com | +91 93847 07189 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EXECUTIVE SUMMARY

Cloud and DevOps enthusiast with 1 year of experience in technical support and hands-on exposure to AWS, CI/CD, and Docker. Skilled in production support, infrastructure monitoring, and troubleshooting. Seeking a Cloud/DevOps role to contribute to reliable and scalable systems.

EDUCATION

Mount Zion College of Engineering and Technology | Pudukottai (2021 – 2025)

B.E – Computer Science and Engineering | CGPA: 7.68

SKILLS

Cloud Tech:	AWS (EC2, IAM, S3, VPC, CW, ELB, ASG, R53)
DevOps Tools:	Jenkins, GitHub, Ansible, Terraform, Docker
Monitoring & Automation:	Prometheus, Grafana, Splunk, CI/CD pipelines
Scripting:	Bash, Python (Basics), SQL
Operations & Soft Skills:	Analytical-Thinking, Problem-solving, Time Management, Leadership

PROJECTS

AWS 3-Tier Web Application Architectures

Tech Stack: EC2, RDS, ALB, VPC, R53, ACM

- Deployed a 3-tier AWS architecture using VPCs and ALBs for isolated static/dynamic routing; secured backend with MySQL RDS and ACM for HTTPS access.
- Achieved high availability and security by customizing subnets and route tables.

CI/CD Pipeline Automation using Jenkins & Kubernetes

Tech Stack: Jenkins, GitHub, Docker, SonarQube, Trivy, AWS EC2, ECR, Kops, Kubernetes

- Developed a non-production CI/CD pipeline on EC2 using Jenkins declarative pipeline with GitHub webhook triggers, email alerts, and Trivy security scans.
- Automated end-to-end flow: Git → SonarQube → Docker → Trivy → ECR → Kubernetes (via Kops).

EXPERIENCE

Technical Support Engineer | PLUS 91 Ultimate Cinemas | Chennai (Jul 2025 – Present)

- Managed web infrastructure operations including hosting, DNS, server troubleshooting, uptime monitoring, and performance optimization in a production environment.
- Maintained WordPress-based infrastructure with security best practices (backups, updates, malware checks) ensuring system stability and reliability.
- Provided backend technical support during the **Eat Beat Repeat** live event, handling real-time monitoring and coordinating with the KYN Ticketing platform under high traffic conditions.

Intranet Application Development | Apollo IT Corporate | Chennai (Jul 2024 – Aug 2024)

- Supported an Azure-based intranet application used across multiple departments, assisting with chatbot integration and semantic search for internal users.
- Helped manage user access control and API security using token-based authentication, following standard IT security practices.
- Documented deployment steps, configuration details, and admin workflows while collaborating closely with senior developers in an enterprise IT environment.

AWARDS AND ACKNOWLEDGEMENTS

- Completed advanced AWS DevOps Training with hands-on projects on infrastructure provisioning, pipeline automation and Docker based containerization.
- Smart India Hackathon (SIH) – National Level Participant.
